RIBBED STOCKINETTE
MAGLIA TUBOLARE A COSTINA

RIBBED STOCKINETTE

The ribbed knit construction makes it a heavier material than the Plain Stockinette.

This also provides increased protection/recovery properties; it is intended for use as a skin covering before the application of plaster of Paris and other splinting materials.

It also may be used as a protective covering under surgical appliances.

The knitted construction allows air to circulate over the skin and its structure is soft and comfortable for patients.

MAGLIA TUBOLARE A COSTINA

Redirib è un bendaggio tubolare a costina privo di cuciture.

Il maggior peso della costina, l'elevata estensibilità e l'ottimo ritorno assicurano una traspirazione, una copertura ed una protezione ideale.

Perfettamente idoneo come materiale sottogesso e per il fissaggio delle imbottiture.

L'elevata versatilità permette economiche e pratiche applicazioni su tutte le parti del corpo.

La giusta compressione della costina garantisce un perfetto autofissaggio.
